**Subject:** RE: R9 fact sheet vs. existing fact sheet

Bill sent a draft to you earlier which needs to be reviewed and approved. Joan thought it was good to have the existing fact sheet since it was already approved and public. Bill's is higher level and more about the historic mining of the area and focused on GKM vs. Red and Bonita mine. They are different.

That would be in addition to what Bill sent earlier?

Liz

I know you agreed with Bill's idea to create new fact sheet that is higher level than this existing one (wasn't sure if you had seen it) – R9 has used existing information from our website to create new one. Joan thinks we should just use this existing fact sheet then no review is needed. This was already sent to congressionals and handed out at public meeting.

Please advise.

Hi, Lisa.

Here you go. I'll shoot more to you in a few. The Gold King Mine fact sheet hasn't been

officially blessed for posting on the webpage, but it is out there, so Tim can decide if he wants to put it on there. It is a little dated now anyway. Sorry for the delay.

Cynthia

Can you send me a copy of any docs you guys have handed out down there? Rich is putting together messaging and needs them and we need to make sure Tim has them to post.

I think everything is being posted on the official Gold King Site, so as long as we are linked to that, I think we are good.

Thanks!
